

DEAL is launching a series of R workshops designed for undergraduate RAs along with Econ honors, 104/204, and master's students. The first session will be held on February 15 at 7pm in the DEAL Lab (Social Sciences 311). This workshop, which assumes no prior knowledge of R, will feature a live demo that you can simultaneously run on your laptop by first following these instructions to download R & Rstudio:

R: <https://www.r-project.org>

RStudio: <https://posit.co/download/rstudio-desktop/>

If you have a Mac, you may need to follow additional steps in order to be able to download packages. Please use the first solution here:

<https://apple.stackexchange.com/questions/254380/why-am-i-getting-an-invalid-active-developer-path-when-attempting-to-use-git-a>

Then, download the introductory session materials from https://github.com/EconDEALDuke/R_Spring_2023/.

However, following the live demo on your laptop is not mandatory, so if you have any trouble with these instructions, do not let that stop you from attending the workshop.

If you have questions, please reach out to Jenna Goldberg at jennifer.goldberg@duke.edu. Hope to see you there on Wednesday night!
